**DATALLEGRO DATA WAREHOUSE APPLIANCES TO INTEGRATE  
WITH IBM INFORMATION SERVER**

**Aliso Viejo, CA – October 16, 2006** – DATAlegro™, supplier of data warehouse appliances that lead the industry in price and performance, today announced integration between its data warehouse appliances and IBM Information Server.

Through the integration, DATAlegro and IBM's joint customers will benefit from seamless interoperability between DATAlegro's data warehouse appliance and IBM Information Server. Together the products will provide a scalable, high performance framework for cleansing, transforming, and delivering information consistently, securely and rapidly throughout the enterprise. The IBM Information Server helps companies integrate information so it can be accessed and used in new ways to drive innovation, increase operational efficiency, and lower risk. DATAlegro's data warehouse appliances offer companies the ability to query large volumes of data extremely quickly to enable real time business intelligence.

"The powerful combination of DATAlegro's data warehouse appliances and the IBM Information Server work together to help customers solve their most challenging information management problems," said **Stuart Frost**, CEO at **DATAlegro**. "We are pleased to be partnering with IBM to support this new approach to information integration."

"We value the contributions DATAlegro can deliver in helping customers to rapidly leverage the IBM Information Server and create unprecedented access to trusted information," said **Pete Fiore**, Vice President, **IBM Information Integration Solutions**. "By collaborating with DATAlegro, we can solve some of the most pressing information management challenges faced by organizations today."

**ABOUT DATALLEGRO™**

DATALlegro offers data warehouse appliances with the best price and performance in the industry. Using DATALlegro's patent-pending technology, companies can run faster and more complex queries on their data in order to increase their business intelligence. Whether you have 1 terabyte of user data or 300, DATALlegro's data warehouse appliances offer record breaking performance at a fraction of the cost of any other offering on the market.

With prices for a complete appliance starting at \$130,000 and table scanning speeds as fast as six terabytes per minute, DATALlegro's data warehouse appliances have set a new standard in price and performance. DATALlegro has offices throughout the US as well as in Europe. Based in Aliso Viejo, California, DATALlegro delivers a fast, flexible and affordable solution that allows a company's data to grow at the pace of its business.
